

Powerful Database System

Flexible and User Friendly Interface

Secure Storage and Backup Provisions

Ability to Globally Manage and Monitor Data

Caters to High-End Users with Advanced Needs

Manage Data, Organise Projects and Export Reports

## Outstanding Customer Support

- One-2-one online demonstration
- Full training and bespoke set up
- Regular software updates
- Personalised phone support
- Comprehensive support services
- NO HIDDEN COSTS!!!!

Exprodo DB has the flexible capabilities to be configured to function in a multitude of different formats such as:

- A Business Intelligence Database — with flexible reporting and permission capabilities.
- A Knowledge Database — for the collection of data representing problems along with their solutions.
- An Active Database — with event-driven architecture for specific data gathering.
- An Operational Database — for storing, organising and monitoring information

Exprodo DB has been utilised by a number of medical research facilities and independent companies to provide a flexible, secure and easily accessible database management system (DBMS) that is independently configured to their own unique requirements.

**Exprodo DB** has been carefully developed to enable it to be utilised in a number of different environments, but without compromising its quality or flexibility. The intelligence behind it allows for a completely customised set up which drastically improves data storage efficiency and enhances workflow in a cost effective, manageable way. Isn't it worth seeing how **Exprodo DB** can work for you?
